Summary

Fourth-year BSc Computer Science (Cloud Computing) student with hands-on software engineering experience across full-stack development, cloud infrastructure, and AI-powered backend systems. Recently completed an internship at Acceltree Software, building a real-time AI voice assistant using Twilio telephony, LiveKit, and LLM-based conversation pipelines.

Education

BSc Computer Science (Cloud Computing) – Honors *2023 – 2027*
MIT World Peace University, Pune, India

- **Current CGPA:** 8.29 / 10
- **Relevant Coursework:** Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks, Cloud Technologies

Technical Skills

- **Languages:** Python, JavaScript, C++, C
- **Backend & APIs:** Node.js, Express.js, REST APIs, WebRTC (foundational)
- **AI & Voice Systems:** LLM Integration (OpenAI), STT/TTS Pipelines, LiveKit, Twilio SIP
- **Cloud & DevOps:** AWS (EC2, S3, EBS), CI/CD Pipelines, Docker, Kubernetes, Git
- **Databases:** MySQL, PostgreSQL, Firebase (Auth, Firestore)
- **Frontend & Tools:** React.js, HTML5, CSS3, OpenCV, MediaPipe

Experience

Software Development Intern – AI & Backend Systems *Jul 2026 – Sep 2026*
Acceltree Software Pvt. Ltd. *On-site*

- Built a real-time AI voice assistant, integrating Twilio SIP telephony with LiveKit's real-time media infrastructure for bi-directional audio streaming.
- Implemented pipeline stages: voice activity detection, speech-to-text (Deepgram), text sanitization, PII masking, and LLM-based response generation.
- Built function-calling integrations linking the assistant to CRM and knowledge-base APIs; collaborated via Git code review.

Web & Communications Intern *Oct 2024 – Feb 2026*
Confederation of Indian Private Universities (CIPU) *On-site*

- Contributed to website content and prepared weekly newsletters (4+ per month); maintained structured databases using MS Excel and Word.

Projects

CloudDeploy – Cloud CI/CD Deployment Platform *2026*
AWS, EC2, S3, EBS, CI/CD, Git

- Built an end-to-end cloud deployment workflow using EC2, S3, EBS, and CI/CD pipelines to provision and manage workloads.

GameHive – Browser-Based Gaming Platform *Feb 2025 – Mar 2025*
HTML, CSS, JavaScript, Firebase

- Designed a full-stack browser platform hosting 6 games, with secure login (Firebase Authentication) and persistent user profiles/scores (Firestore).

JARVIS – Gesture-Controlled Virtual Assistant *Feb 2026 – Apr 2026*
Python, OpenCV, MediaPipe, OCR

- Built a computer-vision assistant with "air writing" input, using real-time finger tracking and OCR to convert hand-drawn text into web searches.

Achievements & Leadership

Best Startup Award – 1st Place, Pune Startup Expo *2025*

- Selected among **1000+ entries** as one of **30+ finalist teams**; won for **Zuno – The AI Career Navigator**, an AI-powered career guidance platform.

Class Representative, MIT World Peace University *2024 – 2025, 2026 – Present*

- Served as primary liaison for 60+ students; coordinated initiatives such as the Rural and National Academic Immersion Programs.
